# Included Features

The below information is included with all of our maintenance plans. In addition, we've provided several examples to help understand our simple fee structure.

## 1. Dedicated Webmaster

With our maintenance plans, you will have a dedicated webmaster that will monitor your website for crawl errors and other mishaps that could hurt your websites overall traffic and page rank. For example, if pages on your website *can't be found* or incoming links to your website suddenly *dead end*, we will redirect traffic, fix individual pages and save your customers the frustration of leaving your website.

## 2. Email Setup & Support

Anytime you need to set up an email account, just give us a call. With our maintenance plans, we will set up, forward, and delete email accounts on demand.

## 3. Web Statistics & Analytics

All of our maintenance plans come with *Google Analytics* reporting. This information is critical when deciding which advertisement campaigns work best for you. With analytics, you will know exactly how visitors find your site, how they navigate through it, and how they've become customers. Google Analytics is the next level of *enterprise class web analytics* giving advertisers, publishers, and website owners a chance to improve their online results.

*\*Please Note: Re-vamping of existing sites or adding dynamic applications; such as e-commerce, and database capabilities, will be quoted separately.*

# Price Plan Examples

- 
1. **\$14.95 - 5% off 1 Update per Month**
    - 1 update bills = \$57.05
  
  2. **\$19.95 - 10% off 2 Updates per Month**
